

# Antimicrobial Lanyards

THE LATEST ADDITION TO OUR PRODUCT RANGE

In today's world, it's never been more important to protect your organisation from the spread of harmful bacteria. Our antimicrobial lanyards are the perfect way to help reduce the spread of this! Lanyards are touched many times a day and traditional lanyards can harbour bacteria over time, carrying it from place to place. These lanyards have been specifically designed to stop the growth and replication of bacteria. So, if you're looking at ways to make your organisation safer and healthier, these lanyards are a great way of supporting this.

**What makes them antimicrobial?** Our antimicrobial lanyards are made from flat polyester and during the manufacturing process a special additive is introduced containing silver. It's this additive that stop the growth of bacteria on the surface of the lanyard. The polyester material means they are durable and long lasting, which makes them ideal for attaching to badge holders and displaying your ID cards.

**Choose from a range of widths** Our antimicrobial lanyards can be manufactured in a range of widths including; 10mm, 15mm, 20mm and 25mm. This allows you to create the perfect look and feel for your organisation.

**Personalise them with your branding and colour scheme** These lanyards can be personalised, meaning they look superior in quality. Dye-sublimation print allows for detailed, full colour personalisation and edge-to-edge print, leaving you with high quality, personalised lanyards that stand out and promote your brand.

## Choose from a variety of extra options

We have a large selection of clips and breakaways available, choose to add a detachable buckle and select from clips including; metal j clip, plastic j clip, metal lobster slip or retractable card reel. Breakaways are available in both flat and curved styles. With a range of great features and benefits, these antimicrobial lanyards are a great choice for any organisation looking to help protect the health and well-being of their staff and visitors.

For even more protection combine these lanyards with Evohold<sup>®</sup> Antimicrobial Badge holders, stopping the growth of bacteria on your holders and lanyards! For more information, or for a quote on antimicrobial lanyards get in touch with us today and one of our specialists will be happy to help you.
